

For the past 50 years, we have proudly had the name "Cortland Memorial Hospital". It is a name that has served the hospital well. But during these years, the hospital has constantly evolved to better serve its patients with added and improved services. Thanks to support from our community, construction projects were undertaken to enlarge and modernize our facilities. Today, key healthcare services are more accessible, not just here, but at locations outside our hospital walls throughout the community. Over time, we have "outgrown" the name Cortland Memorial Hospital. The name does not properly reflect the progress we have made, what we have become today... and what we aspire to be in the future.

So it is with a sense of pride and excitement that we introduce our new name: Cortland Regional Medical Center.

The Center of Your Care

A tradition of growth and improvement
to better serve our patient needs

Cortland Regional Medical Center
134 Homer Avenue
Cortland, NY 13045
(607) 756-3500
www.cortlandregional.org

Our exceptional medical staff provides our community with access to a diversity of medical expertise that rivals many large urban hospitals. These professionals recognize the challenges, opportunities, and quality of life that this region has to offer.

As the leaf represents life and growth, it mirrors the development and vibrancy of our community that we are so deeply nestled in. The new name Cortland Regional Medical Center was adopted because it recognizes our roots, acknowledges our responsibility to an increased service area, and better defines our larger scope of healthcare services and the highly skilled professionals who provide them.

WHY IS THIS THE "RIGHT" NAME?

CORTLAND...

We are proud of our roots and our home.

From its beginnings as a six-bed hospital in 1891 to the present, the Cortland community has always supported the hospital, with financial contributions and with the trust it

has placed in our physicians, our staff, and our services. That is a tradition we value.

REGIONAL...

Today nearly 65,000 people live and work in our service area, which extends beyond the boundaries of Cortland County into Tompkins, Onondaga, Cayuga, and Madison Counties. We are more than a local hospital.

MEDICAL CENTER...

A strategy of continuing to broaden our scope of services and building new and improved facilities has strengthened and diversified overall healthcare options in the region. Highlights include:

- Improved long term care through construction of 80-bed nursing facility
- Made renovations and enhancements to outpatient surgery and procedure center
- Began offering wide variety of home health care services and equipment with CMH Home Health Care
- Expanded diagnostic imaging services and made physical therapy and laboratory services more accessible for the community with our Outpatient Service Center and Euclid Avenue lab station
- Opened non-emergency walk-in Prompt Care center

- Improved emergency care services through construction of new 12,000 square foot addition
- Completed extensive renovations to the first floor of the hospital, including improvements to Laboratory Services, Cardiology, and Admitting/Registration areas
- Partnered with our medical staff to enhance patient care by contracting with hospitalist physicians to ensure 24-hour coverage for inpatients
- Developed a master facility plan that includes a new dialysis center and renovations to key service areas, such as outpatient surgery and maternity
