

CRMC Welcomes Chris Kisacky, VP for Professional Services

The Administration of Cortland Regional Medical Center is pleased to announce the selection of Chris Kisacky as the medical center's new Vice President for Professional Services. In her new role Chris is responsible for overseeing ancillary services, which includes Medical Imaging, Cardiology, Laboratory, Pharmacy, Respiratory Care, and Nutrition. She will also coordinate operation of Regional Medical Practice, an affiliate established by CRMC to help recruit and retain physicians in various medical specialties to address specific healthcare needs of the community. Its purpose is to assist physicians with setting up their new practices, such as providing of-office space, staffing, and other necessary support services.

"We are extremely pleased that Chris has joined our leadership team," said Brian Mitteer, President/CEO. "Her unique combination of professional, organizational, and supervisory skills, coupled with her physician recruitment and physician practice experience, makes her a great asset to the medical center."

Chris brings over 20 years of healthcare experience to her new position. Prior to joining CRMC, she was the Executive Director for Physician Services at Chenango Memorial Hospital in Norwich. While at Chenango Memorial, Chris worked to develop effective relationships between physicians and staff to help establish an environment that fostered exceptional quality care and service. Among her many achievements, Chris recruited nine new physicians to the community, developed initiatives to maintain strong physician relations, and introduced a hospitalist care program. Her previous experience also includes 14 years at United Medical Associates in Johnson City, first as a medical technologist before rising through the organization to become Director of Specialty Care Operations. Chris began her career as a medical technologist, first at Beth Israel Hospital (Boston, MA) and then later at Ithaca College.

Born in Syracuse, Chris graduated from Rochester Institute of Technology with a bachelors degree in Clinical Laboratory Science. She later earned her masters degree in Business Administration, with a concentration in Healthcare, from Binghamton University. Today, her professional affiliations include the American College of Healthcare Executives, Medical Group Management Association, and American Medical Group Association.
