

Mary Nauseef and Mary Snyder Named CRN&RC Nurse Managers

The Administration of the Cortland Regional Nursing and Rehabilitation Center (CRN&RC) recently welcomed Mary Nauseef, R.N., and Mary Snyder, R.N. to its management team. The CRN&RC is an 80-bed facility attached to Cortland Regional Medical Center that specializes in long term residential care, short term rehabilitation, adult day health care, and respite care.

Mary Nauseef is now the nurse manager of Misty Glen, which also serves as the home to the Short Term Rehab unit. She brings over 20 years of healthcare supervisory and staff experience to her new position. Just prior to joining CRN&RC, Mary worked at Cortland Care Center where she was the nurse manager of the Special Care/Dementia Unit. Her responsibilities included staff scheduling, medication reviews, and monitoring the care provided to 40 residents and their families.

Born and raised in Cortland, Mary began her medical training at OCM BOCES, where she earned her licensed practical nurse (LPN) certification. She then went on to Tompkins Cortland Community College and graduated with an associate's degree in Applied Science for Nursing. Mary is presently working towards her bachelor's degree in Nursing.

Mary Snyder is the new nurse manager of Cedar Run. Her selection is a promotion for Mary since she had worked at the CRN&RC as an evening supervisor for the past three years. Her other prior experience includes charge nurse positions at CRN&RC, Highgate Manor Nursing Home (Cortland) and Hermiston Good Samaritan Center (Hermiston, OR). In all Mary has over 16 years experience in long-term health care.

Mary received her associate's degree for Applied Science in Nursing from Blue Mountain Community College (Pendleton, OR). She plans to complete the certification program in Geriatric Nursing, and then earn her bachelors degree in Nursing.

Born in Buffalo, Mary relocated to the Homer area at an early age. For the past 15 years, she has made her home in Cincinnatus.
